Nitty Gritty Aromatherapy Head Lice Solution

Our Nitty Gritty Aromatherapy Head Lice Solution is a simple, no fuss, solution to aid the detection and removal of head lice. It is completely natural, made from a carefully selected blend of essential oils, with no nasty ingredients!

Our solution not only helps the Nitty Gritty NitFree comb to glide smoothly and effortlessly through any hair type but it also helps loosen the glue that sticks the eggs to the hair and immobilise the lice making it difficult for them to move around the head.

100% natural

Made from a blend of essential oils

Immobilises the lice so they can't move around the head while combing!

Loosens up the glue on those pesky eggs!

Aids the NitFree comb to glide effortlessly through even the thickest, curliest hair!

One bottle will do approximately 4-6 applications

Leaves hair incredibly shiny!

Nitty Gritty

HOW TO USE

For the very best results - and to remove 'live' eggs before they hatch - we recommend using our Solution with our award-winning Nitty Gritty NitFree Comb! The micro-spiral design of our comb removes not only the live head lice, but also the 'live' unhatched eggs - which are the main cause of repeated infestations!

1

Make sure the hair is completely tangle free using your regular brush or comb.

Apply the solution to the entire lengths of the hair, saturating from roots to tips. Leave for 20 minutes.

2

Then use clips or hair bands to part hair into 4 sections. Parting vertically down the middle of the head from the forehead to the nape of the neck and then horizontally across just above the ears. This helps stop head lice moving out of the area you're combing and ensures you are working meticulously around the head.

3

Start combing through your first section. Work your way through that section, little by little, gradually adding more hair as you go along, taking the comb along the whole length of the hair from root to tip on each stroke. Make sure you are clearing all lice and eggs before you move onto the next section.

4

After every two or three combings, rinse the comb under the tap to clear the teeth of any lice or eggs.

Pay particular attention to the area close to the scalp, behind the ears and at the nape of the neck, as this is where lice like to lay their eggs.

5

Once finished, wash out the solution then condition as normal and dry hair.

6

If using the plastic nit comb enclosed, repeat these steps every few days to remove any live eggs that may have hatched since your first combing. Keep repeating until you are finding no evidence of live lice or eggs.

Nitty Gritty

SAFETY FIRST

Consult your doctor or health visitor before use if you are PREGNANT, BREASTFEEDING, or EPILEPTIC or thinking of using Nitty Gritty Solution on any child under the age of 2 years old.

SHAKE the bottle well. AVOID contact with eyes, clothing and furnishings. In the unlikely event of an allergic reaction, immediately RINSE OUT the solution with water then shampoo.
