

PRODUCT SPOTLIGHT

Our award-winning Nitty Gritty NitFree Comb

Our amazing Nitty Gritty NitFree Comb is unlike any other product on the market, our micro-spiral comb is the only head lice product which removes not only the smallest head lice as well as the nits – the empty egg cases – but also, most importantly, it even removes the unhatched 'live' head louse eggs, the main cause of repeated infestations.

One comb serves an entire family!

Absolutely no need for any chemicals!

Over 4,000 5 star reviews on Amazon

Over 3 million sold

Lifetime Guarantee

33 round tipped micro-spiral teeth ensure the comb removes even the tiniest unhatched eggs!

Nitty Gritty

HOW TO USE

Our award-winning Nitty Gritty NitFree Comb is designed to be used on hair which has been coated with either our Nitty Gritty Aromatherapy Head Lice Solution or your own regular hair conditioner. Combing dry hair is completely ineffective.

1

Make sure the hair is completely tangle free using your regular brush or comb. NOTE: Combing dry hair is ineffective as lice are able to move freely in dry hair. Our solution stops the lice from moving around.

2

Apply our Nitty Gritty Aromatherapy Head Lice Solution or regular hair conditioner to dry tangle free hair and comb through with a regular comb. Make sure you saturate the scalp and coat the hair from roots to ends. If using our solution leave on hair for at least 20 minutes.

3

Then use clips or hair bands to part hair into 4 sections. Parting vertically down the middle of the head from the forehead to the nape of the neck and then horizontally across just above the ears. This helps stop head lice moving out of the area you're combing and ensures you are working meticulously around the head.

4

Start combing through your first section. Work your way through that section, little by little, gradually adding more hair as you go along, taking the comb along the whole length of the hair from root to tip on each stroke. Make sure you are clearing all lice and eggs before you move onto the next section.

5

After every two or three combings, rinse the comb under the tap to clear it of any lice or eggs. Pay particular attention to the area close to the scalp, behind the ears and at the nape of the neck, as this is where lice like to lay their eggs.

6

Once finished, wash hair with shampoo and then conditioner if using our Nitty Gritty Aromatherapy Solution, or rinse as normal if using regular hair conditioner.
